

# FIRE HOSE BOXES

## INFORMATION SHEET

### When To Use

- » Use to suppress small fires (i.e. grass). If the fire is larger or in an RV/shed/boat: **Call 911!**

### Location

- » Fire hose boxes are located at lots : **24, 76 & 97**

### Fire Box Contents

- » One:
  - Brass hose adapter, silver aluminum 'key' and nozzle.
- » Several lengths of hose with black connectors.
  - Carefully unroll hoses to prevent twisting.

### Using The Fire Hose

1. Remove red cap.
2. Attach brass hose adapter firmly.
3. Attach black connector to hose adapter.
  - Connect as many hoses together as needed.
4. Attach silver aluminum 'key' to top of 'stand pipe'.
5. Rotate 'key' counter clockwise to turn water on.

### After Use

Please ensure the hose is **laid out flat and left to dry completely before putting away**. The hose should be rolled up in a coil(s) as it was found so it is ready for the next use.
